Registration now open – NOF/DOS Congress 2026

We are pleased to announce that **registration for the NOF/DOS Congress 2026 is now open.**

The congress will take place **11-13 November 2026 at Tivoli Congress Center in Copenhagen**, bringing together orthopaedic surgeons, researchers and trainees from across the Nordic countries for three days of scientific exchange, education and networking.

The NOF Congress represents one of the most important meeting points for the Nordic orthopaedic community, providing a platform to share new knowledge, discuss clinical challenges and strengthen collaboration across countries and subspecialties.

A programme with broad scientific scope

The congress programme will feature:

- **Educational sessions** focusing on the training and development of the next generation of orthopaedic surgeons
- A dedicated **Subspecialty Day**, where orthopaedic subspecialties organise symposia and discussions within their respective fields
- **National sessions** from the Nordic countries presenting new research and clinical experiences
- Symposia, panel discussions and presentations by leading experts in orthopaedics

In addition to the scientific programme, the congress offers excellent opportunities for networking, collaboration and discussion with colleagues from across the Nordic region.

Precourse – 10 November

On the day before the congress, a **Precourse will be held at Parken in Copenhagen.**

The Precourse will combine **hands-on workshops, practical training sessions and clinical lectures**, giving participants the opportunity to work with surgical techniques and discuss clinical challenges in a more interactive learning environment.

Participants who register for the **Precourse** will receive a **€100 discount on the congress registration fee.**

Fees:

Congress (11–13 November): **€400 (Early Bird)**

Precourse (10 November): **€100**

Register today

We look forward to welcoming you to **Copenhagen for three days of scientific exchange, education and Nordic collaboration in orthopaedics.**
